MTH 252 Midterm #2 Information

• **Date/Time:** The exam is on Tuesday night, 5/11/2010, at 6PM.

• **Location:**

<table>
<thead>
<tr>
<th>If your lecture time is...</th>
<th>Then you will take the exam in...</th>
</tr>
</thead>
<tbody>
<tr>
<td>1:00 PM</td>
<td>GLFN AUD</td>
</tr>
<tr>
<td>2:00 PM</td>
<td>CORD 1109</td>
</tr>
</tbody>
</table>

• You are permitted a 3x5 note card, handwritten, both sides, with any thing that you want on it and a non-graphing calculator.

• **NOTE:** The “standard indefinite integrals” (listed on the so titled page on my website) are your responsibility; I will not be providing any of those formulas. You can either memorize them or put them on your note card, but I will expect you to be able to apply those formulas. Any other integration formulas that you may need will be provided in a list on the front of the exam.

• The exam covers sections 7.1 – 7.6

• **Things for review:**
  ○ You should review all of the problems (check and practice) from homework assignments 5, 6 and 7.
  ○ You should review all of the examples that we have done in class.
  ○ I will not be providing a list of additional problems to review for the test. I would suggest that you spending your study time doing the above two things.
